

# Organization chart of the Max Planck Institute for Chemistry

## Atmospheric chemistry

Jos Lelieveld  
Managing Director

## Climate geochemistry

Gerald H. Haug

## Multiphase chemistry

Ulrich Pöschl

## Particle chemistry

Stephan Borrmann

## Further research groups

## Joint services

## Kinetics and photochemistry

J. Crowley

## Isotope biogeochemistry

S. Galer

## Chemical kinetics and reaction mechanisms

T. Berkemeier

## Instrumental aerosol analytics

F. Drewnick

## Aerosols, air quality and climate

Y. Cheng

## Communications

S. Benner

## Optical spectroscopy

H. Fischer

## Paleoclimate research

K. Jochum

## Biomolecular analyses and interactions

J. Fröhlich

## Nano and micro-particle research

P. Hoppe

## High pressure chemistry and physics

M. Eremets

## Administration & technical services

I. Lemm

## Radical measurements

H. Harder

## Organic isotope geochemistry

A. Martinez-Garcia

## Organic pollutants and exposure

G. Lammel

## Aerosol and cloud chemistry

J. Schneider

## Terrestrial palaeoclimates

K. Fitzsimmons

## IT

T. Disper

## Atmospheric modeling

A. Pozzer

## Geoscientific databases

B. Sarbas

## Inflammatory processes

K. Lucas

## Atmospherical hydrometeors

M. Szakáll, K. Diehl,  
(JGU Mainz)

## Satellite remote sensing

T. Wagner

## Administration

I. Lemm

## Organic reactive species

J. Williams

## Micropaleontology

R. Schiebel

## Aerosol analysis and microscopy

C. Pöhlker

## Aerosol and cloud physics

R. Weigel,  
(JGU Mainz)

## Instrument development & electronics

F. Helleis

## Facility management & operational technology

C. Pallien

## Junior scientist support

K. Sulsky

## Workshops

R. Wittkowski
